[Copy](#) [Expand all](#) [Collapse all](#)

The screenshot shows the 'Account Management' section of the Amazon Ads Advanced Tools Center. At the top left is the 'amazon ads' logo and 'Advanced tools center'. A search bar is at the top right. Below the header, there's a navigation bar with a back arrow, the text 'Account Management', and a forward arrow. The main content area has a dark background with some white text and icons.

🔗 `create_user_invitations`

Create user invitations for advertising accounts. Sends invitations to users with specified permissions.

REQUEST BODY SCHEMA: `application/json`

— body > object

The screenshot shows the 'Request samples' section for the `create_user_invitations` endpoint. It features a 'Payload' button. Below it, a 'Content type' field is set to `application/json`. A JSON editor shows the following payload structure:

```
Copy   Expand all   Collapse all
{
  - "body": {
      "notifyInvitedUsers": true,
      + "userInvitationRequests": [ ... ]
    }
}
```

🔗 `get_terms_token`

Get the terms token status for the customer.

The screenshot shows the 'Request samples' section for the 'account_management' endpoint. It includes a 'Payload' button, a 'Content type' dropdown set to 'application/json', and a JSON schema definition:

```
Copy   Expand all   Collapse all
{
  - "body": {
    "termsToken": "string"
  }
}
```

🔗 get_user_invitation

Get details of a specific user invitation by ID.

REQUEST BODY SCHEMA: application/json

— body > object

The screenshot shows the 'Request samples' section for the 'get_user_invitation' endpoint. It includes a 'Payload' button, a 'Content type' dropdown set to 'application/json', and a JSON schema definition:

```
Content type
application/json
```

The screenshot shows the 'Account Management' section of the Amazon Ads Advanced Tools Center. At the top left is the 'amazon ads' logo and 'Advanced tools center'. A search bar with a magnifying glass icon is at the top right. Below the header, there's a navigation bar with a back arrow, the text 'Account Management', and a forward arrow. The main content area has a dark background with white text. It contains two closing curly braces '}' stacked vertically.

🔗 list_user_invitations

List all user invitations for an advertising account.

REQUEST BODY SCHEMA: application/json

— body > object

The screenshot shows the 'Request samples' section for the 'list_user_invitations' endpoint. It features a large dark box containing a 'Payload' tab and a 'Content type' section. The 'Content type' section shows 'application/json' selected. Below this, there are three buttons: 'Copy', 'Expand all', and 'Collapse all'. The payload content is displayed as a JSON object:

```
{  
  - "body": {  
      "maxResults": 1,  
      "nextToken": "string"  
    }  
}
```

🔗 query_account_link

Query account links. Manager Account users can retrieve details about all accounts linked to their

amazon ads Advanced tools center

    + "relationshipTypeFilter": { ... },  
    "nextToken": "string",  
    "maxResults": 100  
  }  
}
```

🔗 query_advertiser_account

Query an advertiser account. Returns global/manager accounts with DSP account ids available in `alternateIds.dspAdvertiserId`.

REQUEST BODY SCHEMA: application/json

body required object

The screenshot shows the 'account_management' endpoint details in the Amazon Ads Advanced Tools Center. The 'Content type' is set to 'application/json'. The payload schema is as follows:

```
{  
  - "body": {  
    + "advertiserAccountIdFilter": { ... },  
    + "isGlobalAccountFilter": { ... },  
    "maxResults": 0,  
    "nextToken": "string"  
  }  
}
```

Copy Expand all Collapse all

🔗 redeem_user_invitation

Redeem a user invitation to gain access to an advertising account.

REQUEST BODY SCHEMA: application/json

— body > object

Request samples

Payload

Content type

application/json

Copy Expand all Collapse all

The screenshot shows the top navigation bar with the Amazon Ads logo and "Advanced tools center". Below it, a search bar with a magnifying glass icon is visible. A dropdown menu is open, showing a single item: "Account Management". To the left of the dropdown, there's a back arrow and the text "account_management". To the right, there's a forward arrow.

🔗 update_advertiser_account

Update an advertiser account.

REQUEST BODY SCHEMA: application/json

— body > object

Request samples

Payload

Content type

application/json

Copy Expand all Collapse all

```
{  
  - "body": {  
    + "advertiserAccounts": [ ... ]  
  }  
}
```

🔗 update_user_invitations

Update user invitations. Supports revoking or resending invitations.

REQUEST BODY SCHEMA: application/json

The screenshot shows the 'Request samples' section for the 'account_management' endpoint. It includes a 'Payload' button, a 'Content type' dropdown set to 'application/json', and a code editor with JSON content:

```
Copy   Expand all   Collapse all
{
  - "body": {
      "notifyInvitedUsers": true,
      + "updates": [ ... ]
    }
}
```

@update_account_currency

Update the currency code of an advertiser account.

REQUEST BODY SCHEMA: application/json

— body > required object

The screenshot shows the 'Request samples' section for the 'update_account_currency' endpoint. It includes a 'Payload' button, a 'Content type' dropdown set to 'application/json', and a code editor with JSON content:

```
Content type
application/json
```

The screenshot shows the 'Account Management' section of the Amazon Ads Advanced Tools Center. At the top left is the 'amazon ads' logo and 'Advanced tools center'. A search bar with a magnifying glass icon is at the top right. Below the header, there's a dark sidebar with a downward arrow icon. On the left, under 'Account Management', there's a link 'account_management' with a right-pointing arrow. The main content area is dark and mostly blacked out.

@update_account_name

Update the display name of an advertiser account.

REQUEST BODY SCHEMA: application/json

body > object
required

The screenshot shows the 'Request samples' section for the update_account_name endpoint. It features a 'Payload' button. Below it, the 'Content type' is set to 'application/json'. A JSON payload is displayed with options to 'Copy', 'Expand all', or 'Collapse all'. The payload is:

```
{  
  "body": {  
    "advertiserAccounts": [ ... ]  
  }  
}
```

@update_account_timezone

Update the timezone of an advertiser account.

The header features the Amazon Ads logo, the text "Advanced tools center", a search bar with a magnifying glass icon, and a dropdown arrow icon.
